Supply & Demand Zones

DEMAND ZONE:

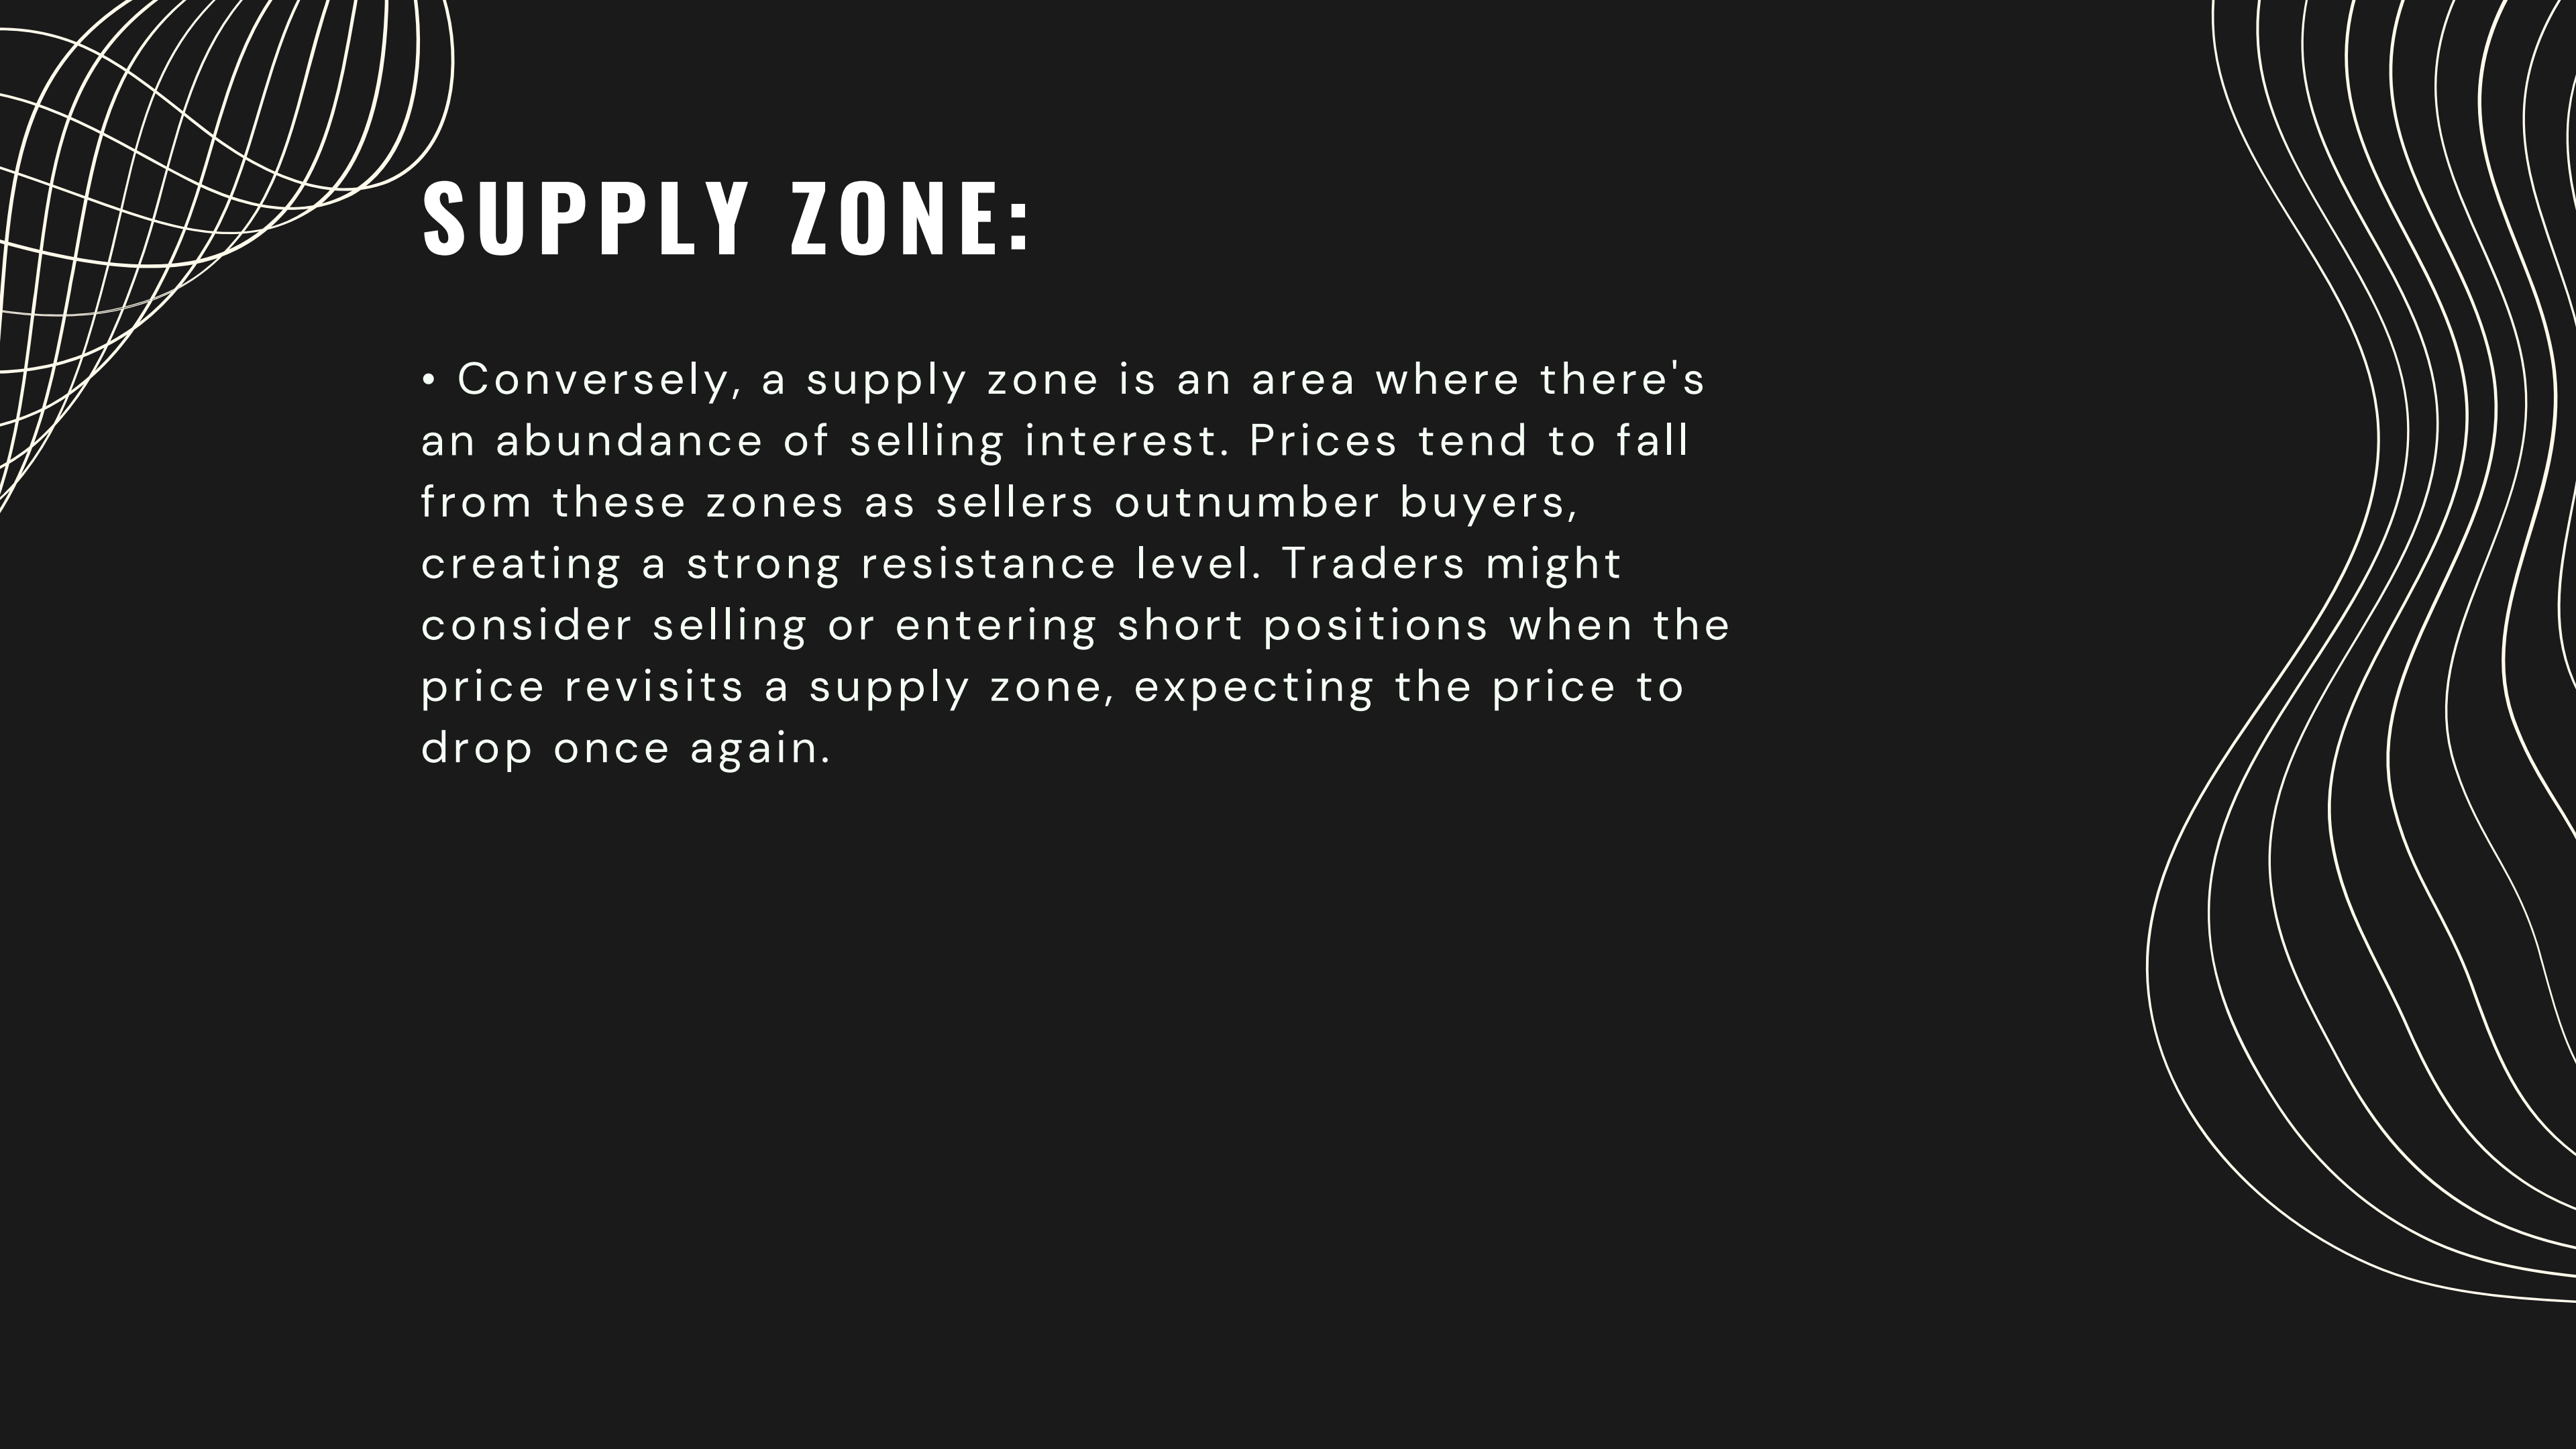

- This is an area on the chart where there is a high concentration of buying interest. Prices tend to rise from these zones because buyers outnumber sellers, creating a strong support level. Traders often look to buy or enter long positions when the price revisits a demand zone, expecting the price to bounce up again.

Gold Spot / U.S. Dollar, 1h, OANDA O2020.360 H2021.675 L2020.165 C2021.235 +0.875 (+0.04%)

SUPPLY ZONE:

- Conversely, a supply zone is an area where there's an abundance of selling interest. Prices tend to fall from these zones as sellers outnumber buyers, creating a strong resistance level. Traders might consider selling or entering short positions when the price revisits a supply zone, expecting the price to drop once again.
